

CPSM GENERAL REGULATION

7.11(1) As an alternative to section 7.10 (remediation and reassessment), a participant who receives the designation of "partially successful in the MPAP" may request that conditions be imposed on his or her certificate of registration in the full (practising) class so as to include in his or her professional practice only those area or areas in which the participant was successfully assessed.

7.11(2) The registrar may grant the request if the participant's remaining area or areas within the scope of his or her professional practice are sufficiently broad so as to permit the participant to independently engage in the practice of medicine in a safe and effective manner, and Subsection 3.76 (changing registration when partially successful in MPAP) then applies.
